

Innovate for Good

APPALACHIAN STATE UNIVERSITY®
WALKER COLLEGE OF BUSINESS

Girls NCWIT Aspire IT Camp and Boys Robotics Camp 2019

Day 1
Monday, July 22nd

On Monday, July 22nd the Walker College of Business at Appalachian State University was ecstatic to begin its “Innovate for Good” program for girls and boys. The auditorium boomed with excitement as campers filed in the auditorium. Dean Norris kicked off the day welcoming campers and parents. Once parents left, the campers were divided into their groups and sent to a classroom to learn and discuss one of our four major topics: Data Analytics, Scratch Animation, IoT, App Inventor 2, along with Robotics for the boys. Campers took part in multiple activities: animating dragons, collecting data from the accuracy of throwing paper balls into the trash can, building robots, etc. The primary goal of today was to have the campers choose one of the four topics to create a project to present by the end of the camp.
