APPALACHIAN STATE UNIVERSITY®
WALKER COLLEGE OF BUSINESS

Girls NCWIT Aspire IT Camp and Boys Robotics Camp 2019

Day 4
Thursday, July 25th

On Thursday, July 25th campers worked on their projects all day. Some groups, such as Data Analytics continued learning and were taught a program called “Tableau,” an interactive data visualization software that companies all over the world use. After lunch, students put the final touches on their projects and began practicing for their presentations on Friday.

In the evening, the overnight campers wowed us with their many talents at our talent show! We had many acts such as singing, dancing, and acting!
