

Innovate for Good

APPALACHIAN STATE UNIVERSITY®
WALKER COLLEGE OF BUSINESS

Girls NCWIT Aspire IT Camp and Boys Robotics Camp 2019

Day 2
Tuesday, July 22nd

On Tuesday, July 23rd the campers were divided into one of the following groups: IoT, Data Analysis, Scratch, or App Inventor. Students then gathered into groups in their classrooms and started working on a project focused around a social issue of their choosing for the first half of the morning. For the second half, students attended an info session led by David Schouweiler who taught the campers about the importance of Website Design.

After lunch, the students attended two more info sessions. In the first session, students learned about Internet and Social Media Safety with Mrs. Julie Taubman. There, campers did activities such as imitating how a router works by connecting strings to the router to imitate how the signal works. In the other info session, the campers learned about Financial Literacy with Dr. Brandy Hadley and learned how to manage simple finances and investments.
